THIRD PARTY GRADED COINS & CURRENCY

The coin market is speculative and unregulated. Many areas of numismatics lend themselves to third party grading and authentication. Such certification does not eliminate all risks associated with the grading of coins and currency. Grading is a subjective matter and opinions as to the grade of a certified or uncertified item can differ. Items graded by the various services carry the guarantees, if any, of that particular service. Securing performance on any such guarantee is strictly between the purchaser and the particular grading service. Coast to Coast may or may not agree with the grade assigned by the particular grading service. Buyer should be aware that grading standards of coins have changed from time to time in the past and may do so again in the future.
